

The Embrace Kids Garden

Celebrating Our Partnership with RWJ Hospital in New Brunswick

For 26 years, Embrace Kids has funded impactful programs, essential staff and epic parties within the Children's Hospital. It was time to provide patient families with a great outdoor space. There is nothing better than some fresh air for healing and relaxation.

In late June 2017, the Embrace Kids Garden was opened for use by pediatric patient families. Families now have a fun and safe space to enjoy fresh air, play, and relax outside.

The Garden was possible due to the long-standing and relationship between Embrace Kids and RWJUH. There are dozens of people from both organizations that have collaborated at the highest level with the sole goal of making improvements for the kids and families. Those close ties are what enabled 26 years of major gifts and what makes it possible to always put families first – that is all that matters to us! True Collaboration...
